TAR-SEAL TECHNICAL APPLICATION GUIDE

DESCRIPTION

RENEWS & REFRESHES ANY EXISTING TARMAc DRIVEWAY

Replaces lost resin from tarmac
Covers unsightly cement & oil stains or marks
Recreates original colour of tarmac
No need for expensive asphalt replacement

Universeal Tar-seal is a unique, hard wearing, long lasting, tarmac asphalt sealer. Quickly transforms the tired, dull worn look of your drive or pathway, returning it to a good as new look.

Universeal Tar-seal is more than a tarmac paint, its unique formula contains a blend of technical acrylic resins which restore the original colour, flexibility and weather resistance of the tarmac surface.

PREPARATION

Before any application of **Universeal Tar-seal**, ensure the surface is thoroughly cleaned and loose stones etc. are thoroughly swept off. For best results it may be necessary to clean the tarmac by power washing the surface, if algae or moss is present a pre-treatment with **Universeal No More Algae** moss and algae remover will be necessary 4-5 days prior to applying the sealer.

DIRECTIONS FOR USE

- 1) Make sure the surface is completely clean and dry, apply neat product generously and evenly using a good quality floor roller.
- 2) Apply a second coat, repeating the process applying the sealer in the opposite direction for even colour distribution. Allow a minimum of 3-4 hours drying time before driving or parking cars on the surface, if possible leave over-night before using the surface.

Please Note: Do not apply sealer if rain is forecast for at least 3 hours after application. Always try product in an inconspicuous area prior to use.

COVERAGE

2-5m² per litre. Up to 25m² per 5L.
Coverage will vary depending on surface texture and porosity.

Usage Guidelines

Drying Time	Applications/Coats	Application Method	Dilution
45-60 mins	2-3 coats	Brush/ Sprayer/Roller	Undiluted

PRECAUTIONS

KEEP OUT OF THE REACH OF CHILDREN & PETS
