NO MORE BLACK SPOT TECHNICAL APPLICATION GUIDE

DESCRIPTION

PROFESSIONAL OUTDOOR CLEANING PERFORMANCE

Removes stubborn aged black and grey lichen algae spots from all masonry and natural stone surfaces

Suitable for Professional and DIY use

Also removes red and green algae, reviving the surface to its original appearance

Easy application, supplied as a ready to use liquid

Universeal No More Black Spot is a professional grade outdoor cleaner which eliminates all traces of stubborn grey lichen and black spots from all masonry and natural stone surfaces.

DIRECTIONS FOR USE

- 1) Before use remove any loose debris from the patio area, always pre-wet the surface area with clean water prior to applying the Universeal No More Black Spot cleaning fluid.
- 2) Apply neat, taking care not to spill the cleaner on sensitive surfaces, i.e. fabrics. Carefully transfer the cleaning fluid from the bottle to a pump sprayer or watering can. If these containers are not available then cleaning fluid can be used directly from the bucket. Apply generously.
- 3) The cleaning fluid needs to be left on the surface for at least 2 hours, during that time the surface must not be allowed to dry out. If necessary mist with additional cleaning fluid or with clean water to prevent the paving from drying. Work the area(s) of staining with a brush, if necessary, but ensure the surface remains wet at all times.
- 4) After the 2 hour cleaning period, the treated area should be washed down with clean water first to neutralise the cleaner before then power wash off with clean water. **Please note the cleaning fluid can harm or possibly kill vegetation so try to avoid washing off onto garden or lawned areas. If this unavoidable then rinse with plenty of clean water to dilute the cleaner.**

Please Note: In cases of severe black and white lichen contamination, leave the product to dwell overnight and power wash off the following morning. Universeal No More Black Spot contains chlorine as an active ingredient and will stain fabrics and sensitive materials. The fluid might cause slight lightening of some surfaces – always try product in an inconspicuous area prior to use.

COVERAGE

Apply NEAT. Do not exceed 5m² per Litre (Maximum 25m² per bottle)

Usage Guidelines

Dwell Time	Applications/Coats	Application Method	Dilution
2 hours	1-2 applications	Brush/ Sprayer/Roller	Neat
