# GROUT RESCUE X TECHNICAL APPLICATION GUIDE

## DESCRIPTION

### RENEW & COLOUR EXTERNAL GROUT FOR LONG-TERM PROTECTION

100% frost, stain and water proof

One coat application to recolour, renew and protect grout and pointing

Eliminate frost damage, cracking and weed & grass growth between tiles

**Universeal Grout Rescue X** helps to keep external patio grout joints clean, watertight and in pristine condition. Simple to apply, our polymer based formulation bonds securely onto the grout joint, protecting, sealing and consistently colourising for a long-term barrier. Available in 5 practical colours, when fully cured, it permanently seals patio grout to help protect against mould, mildew and staining for up to 15 years.

Suitable for use on grout & pointing applied to: **Porcelain & ceramic tiles plus non acid sensitive stone: sandstone, quarry tiles, terracotta, slate, granite, etc.**

## DIRECTIONS FOR USE

**NOTE: Due to our improved formula's high polymer strength, you must complete a test patch to determine how long the product can be left on the surrounding tiles / slabs / pavers. Depending on the type of tile, you may need to remove the product excess within 5-10 minutes – note, if left too long it will be extremely difficult to remove.**

This product follows a two stage process:

**Stage 1:** Using Grout Rescue X Pre-treat Cleaner is very important to achieve perfect results prior to application of Grout Rescue X. Prime (etch) the grout surface area by thoroughly cleaning grime, debris and algae/lichen with the Pre-treat cleaner as per its instructions.

**Stage 2:** Make sure grout joints are clean and thoroughly dry before applying Grout Rescue X. **Shake bottle & mix well before use, always a complete a small test patch to understand best process of application.**

Apply product thinly onto the grout joint using a small paint or tooth brush, working it evenly onto the grout surface. Wipe away any sealer with a damp cloth or sponge from the tile edge instantly or within a maximum of 10 minutes of application, being careful not to disturb the treated grout joint.

Dries within 1-2 hours, and achieves full cure within 48-72 hours. Avoid unnecessary use or footfall during this time period. **If using more than 1 bottle of a single colour for an application, mix all materials to ensure colour match and consistency.**

**Please note: d Poor application, applying the product too heavily or thickly onto the grout joint can result in blistering, cracking and de-bonding.**

**Always perform a small inconspicuous test on-site to determine suitable application process for your project. Call our support helpline on +44 (0)1300 345 898 (option 2) or use the contact form on our website for technical support. FOR EXTERNAL USE ONLY.**

## Usage Guidelines

Drying Time	Applications/Coats	Application Method	Dilution
1-2 hours	1 coat	Brush/ Sponge/Pad	Undiluted

## COVERAGE

16-30m<sup>2</sup> per 450ml bottle.

Coverage offered as guidance. Will vary depending on tile size, grout width, surface porosity, texture and application process.

## SUGGESTED FIRST AID PROCEDURES

**EYE AND SKIN CONTACT:** Flush thoroughly with water, if irritation persists seek medical attention.

**IF INGESTED:** Drink 1 to 2 glasses of water, do not induce vomiting and seek medical attention.

Product SDS sheet available upon request.

This information is offered without guarantee. It is the user's responsibility to ascertain the suitability and safety of this product thus assuming all liability and risk thereof. In case of doubt, the product should be tried out in an inconspicuous area. In the event of failure, the manufacturer shall be obliged to replace such product proven defective.

## STORAGE INFORMATION

Product shelf life is 36 months when unopened and stored at room temperature. Store product in original container only. Close cap on container after each use. Use only when surface temperatures are between 50° F – 90° F (10° C – 32° C).
