GROUT RESCUE COLOUR & SEAL TECHNICAL APPLICATION GUIDE

DESCRIPTION

Universeal Grout Rescue Grout Colour Sealer is a great way to restore and renew your wall and floor grout to a better than new condition. Grout Rescue colour sealer is available in 10 stylish colours, when fully cured, permanently seals the grout to help protect against mould, mildew and staining.

In many instances when the grout has become permanently stained and no amount of cleaning can bring back the original uniform clean look of the grout. In these cases it is best to apply **Universeal Grout Rescue Grout Colour Sealer** to restore the grout to a permanently sealed even coloured finish.

Universeal Grout Rescue Grout Colour Sealer can restore even the dirtiest, damaged and ugly grout to a new look finish. This process will permanently colour and seal the grout to make the grout look even better than the day it was installed. **Universeal Grout Rescue Grout Colour Sealer** is safe and simple to use, this unique formula allows for easy application by the professional tradesman and DIY homeowner

DIRECTIONS FOR USE

NOTE: Due to our improved formula's high polymer strength, you must complete a test patch to determine how long the product can be left on the surrounding tiles. Depending on the type of tile, you may need to remove the product excess within 5-10 minutes or it may be possible to leave up to 30 minutes – note, if left too long it will be extremely difficult to remove.

For best results, we recommend a two-stage process:

Stage 1: Prime the grout surface area on both old and new installations with Grout Rescue Pre-Treatment.

Stage 2: Apply Grout Rescue Colour & Seal when the grout joints are clean and thoroughly dry.

- 1) Shake the bottle & mix well before use. If using more than 1 bottle of a single colour for an application, mix all materials to ensure colour match and consistency. Make sure the grout joint is clean and thoroughly dry before applying Grout Rescue.
- 2) Gently squeeze the bottle to apply steadily and consistently onto the grout joint using your preferred application tool, eg a small, stiff brush or sponge working it evenly onto the grout surface. Wipe away any excess sealer from the tile surface within the timeframe established from the project test (as a guide, within 30 minutes or less). Work in small manageable areas whilst applying and cleaning down – your test patch will dictate when to halt application to remove excess.
- 3) Allow 48 hours drying time before wetting (using shower room) or cleaning the treated grout area.

Poor application, applying the grout colourant too heavily or thickly onto the grout joint can result in blistering, cracking and de-bonding of the colour sealer. This product is not recommended for use around porous surfaces i.e. unglazed tiles and natural stone surfaces as it could permanently stain. FOR INTERNAL USE ONLY.

Usage Guidelines

Drying Time	Applications/Coats	Application Method	Dilution
30-60 mins	1 application	Pad/Brush/Sponge	Undiluted

SUGGESTED FIRST AID PROCEDURES

EYE AND SKIN CONTACT: Flush thoroughly with water, if irritation persists seek medical attention. **IF INGESTED:** Drink 1 to 2 glasses of water, do not induce vomiting and seek medical attention.

STORAGE INFORMATION

Product shelf life is 36 months when unopened and stored at room temperature. Store product in original container only. Close cap on container after each use. Use only when surface temperatures are between 50° F – 90° F (10° C – 32° C).

COVERAGE

3-15m² per 237ml bottle

This will vary dependent on tile size & grout width.

COLOUR MATCHING

Please note: We do not manufacture sample bottles or provide smaller sizes. The swatches provide a near match to the actual product, however, as you may expect, screen displays and print processes cannot match the colours 100% accurately, so if colour matching is crucial, we recommend you find a stockist and see the product colours in store. We will not be responsible for any colour matching problems as it remains the final responsibility of the user to confirm colour suitability. Due to the original Grout colour, texture, grout width, and artificial and natural lighting the finished Grout Rescue stain colour may dry slightly differently once applied. Always do a small test prior to use to check suitability. Our colour chart must be used as a guide only. If you require further support or guidance, please contact our technical helpline on 01300 345 898 (ext 2).

IMPORTANT: WE ARE UNABLE TO ACCEPT RETURNS OF OPENED PRODUCT. Please ensure you are happy with your colour choice prior to opening the bottle
